

You are invited to attend
British Exhibition of Security Technology

A 3-day event on
Tuesday 10th, Wednesday 11th and Thursday 12th June

9am - 5pm

at

**El Alamein Suite
Victory Services Club
63-79 Seymour Street
London
W2 2HF**

A specialised exhibition for installers, end-users and consultants

You can see complete, integrated solutions for your security project - All made in Britain

The best British security companies demonstrating exciting equipment and new solutions. The designs you will find here will be cutting edge and come with the quality and service assurances from buying British.

Some great reasons to attend:

- See complete security solutions under one roof
- Tecton's JIGSAW - A video over the network transmitter that sends video, alarms, audio and camera control signals over the internet or network
- Celebrate Mercer's 30th Birthday with a bubbly treat
- Famous Raytec demo's of their Voyager range - interesting and vital to night-time security jobs
- Cortech display their Datalog 4 - a complete security software management tool (and its on working display in conjunction with other BEST equipment!)
- Postfield will have their interactive customer information displays here - try before you buy
- Tecton launch the LIBERATOR, the next generation in real time digital evidence recording
- Bespoke control room design from Thinking Space - free quote requests
- Innaugral BEST award nominations - you help shape the future of our industry
- Buffet lunch, bar and prize draws on all 3 days
- Advanced radio telemetry from W&D ORION

Turn Inside for a Design Solution and Details of Prize Draw

An example of Integration

There are plenty of other examples where these companies have worked on lots of new products and exciting technology making the previously impossible

The control room has been designed and installed by Thinking Space - experts in control room furniture. Thinking Space work with the customer at every stage to ensure that function meets cutting-edge design and comfort. A technical sales team will be at BEST ready to talk to you about your control space.

A Bespoke Thinking Space design

The evidence that is captured on sites is digitally recorded to Tecton's high resolution, top-end, digital evidence recorders. Our new UGLI has 6 huge drives, which are instantly removable and perfect for recording for long periods at high rate recording speeds. This will be on display at BEST, along with our other Digital recorders, the Darlex, the Digital Drax, the Audio Darlex and the brand new, real-time, high resolution LIBERATOR project!

The UGLI Recorder

The NEW Digital Drax

Tecton's new Jigsaw product. A video-over-the-network transmitter

Raytec's night-time ANPR

The leading independent British designers and manufacturers of quality radio communication products. In our example above, information is sent to and from the control room and station using the ORION - a multiple wireless link with advanced radio telemetry.

Raytec are world leaders for CCTV and are renowned for their interesting demonstrations.

In this example, their infra-red cameras provide a solution to the common problem of detecting dark features in dark backgrounds. Their special ANPR detection cameras can read out number plates from long distances at night-time.

These cameras and solutions from Raytec will be on display at BEST.

on from **BEST** exhibitors

Large projects to provide a solution, come and find out where. There will be more now possible. Challenge us to find out how we can meet your needs.

Real-time, high resolution recordings are made using Tecton's Liberator digital video recorder. This is not just a digital recorder - it has many other useful and patented features, like camera control over the network, down the coax. Full software suite accompanies.

Control Room

CORTECH
Developments Ltd

Advanced radio telemetry from W&D
Cortech's Datalog 4 in action

Cortech offer the complete security management solution using Datalog 4, a modular software suite that delivers ease of operation, a high level of operator accountability and optimum control. The software integrates with a wide range of different manufacturers control equipment; including Security, Fire, Perimeter, Digital Recording, Intercom, Access, Building Alarms and other emerging technologies.

Postfield
Systems

Postfield Systems provide bespoke systems for train networks, Customer Information Displays, Driver Only Operation CCTV and Monitors. In our example here they are using all these to good effect. Up-to-date train information is displayed on monitors throughout the station, whilst driver controlled CCTV of the platform keeps passenger safety levels extremely high. Data is sent back to the control room for analysis and recording in the case of an incident.

At the remote station...

Celebrating 30 years!

MERCER | CCTV EQUIPMENT MANUFACTURERS

Mercer's high quality dome cameras capture 360 degrees of movement and images. Constant innovations and engineering mean that they have the best in CCTV camera dome technology on show. New products on display will feature the new Mercer Vehicle-Mount dome - sure to be a mainstay in the security-emergency services sector into the future
